

Dear Governor Schwarzenegger,

As a public service to the people of California I operate a public service website [www.mystatefraudstory.com](http://www.mystatefraudstory.com) I have uncovered the fact that State Compensation Insurance Fund is allowed to not only get away with totally unlawful Claims handling , as evidence of their own Documents. SCIF is even allowed to get away with lying to a California State Senator to cover up their unlawful acts.

Californians pay Billions of dollars a year into a broken system. State Funds unlawful actions and the apparent lack of interest on the part of any state official to put a stop to such unlawful action, could lead visitors to my website, to believe Californians comp system has no accountability and State Fund runs the system. Would it not then be just a money making scam? The WCAB and the DIR have know about SCIF's unlawful actions for quite some time but do absolutely nothing to protect the public from a possibly of becoming SCIF's next victim.

If SCIF not being held accountable despite the very fact that it is their documents that provide overwhelming evidence of unlawful claims active to save money, then Californians are being unnecessarily exposed to the possibility of being victimized by unlawful active by a state agency for monetary gain

Every state agency has visited my website over and over and people are well aware of what State Fund is allowed to get away with.

Governor, could some people be getting kickbacks , bribes or some other perks for allowing SCIF to get away with such totally unlawful active even despite the very fact that the evidence is so overwhelming in so far that it is SCIF's own documents that prove their most outrages wrongdoing?

As a public service I would like to post your response on my public service website. To show Californians and state employees that you are not going to condone unlawful treatment of the public for any reason .State Fund should not be allowed to break the law and force families into object poverty and benefit from same. The poor should not be denied justice. You oversee all state agencies as such I do not believe that you Governor would condone such unlawful active by such a very political powerful state agency.

On behalf of the people of California  
I look forward to a quick and positive reply.

Sincerely  
Larry Nign
